

## Profile

Toyota Industries Corporation was founded in 1926 by renowned Japanese inventor Sakichi Toyoda to manufacture automatic looms. Toyota Industries proceeded over the years to diversify into such fields as automobiles, materials handling equipment, electronics and logistics solutions. In line with its strategy of globalization, Toyota Industries has production facilities not only in Japan but also in Europe, North America, Asia and other regions.

The business domains of Toyota Industries consist of four segments: Automobile, which comprises the vehicle (automobile assembly), engine and car air-conditioning compressor businesses; Materials Handling Equipment, which specializes in forklift trucks and other materials handling equipment; Textile Machinery, which covers the spinning and weaving machinery businesses; and Others, which includes electronics, logistics solutions and other businesses. Each of these segments already has or is gaining a secure footing in its particular fields.

Developing technological and market synergies among our various businesses to produce added value, we aim to achieve a conglomerate premium so that the worth of Toyota Industries as a whole adds up to more than the sum of its parts.
