

Toyota Industries 8th Environmental Action Plan (FY2027 to FY2031)

Action Policy	Targets and Implementations												
Reduction of GHG Emissions in Business Activities	<ul style="list-style-type: none"> Reduction of Scope1 and 2 Emissions <table border="1"> <thead> <tr> <th>Boundary</th> <th>Indicator</th> <th>Target of FY2031</th> </tr> </thead> <tbody> <tr> <td>Global</td> <td>Emissions</td> <td>Reduce by 42% compared with FY2022</td> </tr> </tbody> </table> Renewable Energy (Electricity) Usage Rate <table border="1"> <thead> <tr> <th>Boundary</th> <th>Indicator</th> <th>Target of FY2031</th> </tr> </thead> <tbody> <tr> <td>Global</td> <td>Usage Rate</td> <td>60%</td> </tr> </tbody> </table> <ul style="list-style-type: none"> Introduction of energy-efficient production technologies Promotion of continuous daily energy-saving activities Active introduction of renewable energy 	Boundary	Indicator	Target of FY2031	Global	Emissions	Reduce by 42% compared with FY2022	Boundary	Indicator	Target of FY2031	Global	Usage Rate	60%
Boundary	Indicator	Target of FY2031											
Global	Emissions	Reduce by 42% compared with FY2022											
Boundary	Indicator	Target of FY2031											
Global	Usage Rate	60%											
Reduction of GHG Emissions across the Value Chain	<ul style="list-style-type: none"> Reduction of Scope 3 Category 11 Emissions <table border="1"> <thead> <tr> <th>Boundary</th> <th>Indicator</th> <th>Target of FY2031</th> </tr> </thead> <tbody> <tr> <td>Global</td> <td>Emissions</td> <td>Reduce by 30% compared with FY2019</td> </tr> </tbody> </table> <ul style="list-style-type: none"> Development of technologies to improve energy efficiency Promotion of the transition to electrified products Development of technologies for a hydrogen-based society Utilization of low-carbon fuel Efforts to engage suppliers in reducing Scope 3 Category 1 emissions 	Boundary	Indicator	Target of FY2031	Global	Emissions	Reduce by 30% compared with FY2019						
Boundary	Indicator	Target of FY2031											
Global	Emissions	Reduce by 30% compared with FY2019											
Minimization of Resource Inputs and Expansion of Recycled Material Usage	<ul style="list-style-type: none"> Promotion of switching from virgin materials to recycled materials Promoting product designs that enable the use of recycled materials Reduction of resource inputs through the miniaturization, weight reduction, and other measures applied to new products Promotion of reducing and reusing packaging materials 												
Promoting Long-lasting and Reusable Product Design and Resource Recovery of Waste	<ul style="list-style-type: none"> Promoting product designs for longer lifespans and easier reuse Promotion advancing waste recycling and resource recovery Reduction of waste generation from factories <table border="1"> <thead> <tr> <th>Boundary</th> <th>Indicator</th> <th>Target of FY2031</th> </tr> </thead> <tbody> <tr> <td>Japan</td> <td>Waste generation Intensity</td> <td>Below the FY2022 results</td> </tr> </tbody> </table> <ul style="list-style-type: none"> Source reduction measures, including yield improvement initiatives 	Boundary	Indicator	Target of FY2031	Japan	Waste generation Intensity	Below the FY2022 results						
Boundary	Indicator	Target of FY2031											
Japan	Waste generation Intensity	Below the FY2022 results											
Assessment and Conservation of Biodiversity and Water Resources	<ul style="list-style-type: none"> Assessing the impacts of our business activities on biodiversity and water resources, monitoring relevant regulatory developments, and clarifying the direction of our conservation efforts Promotion of biodiversity conservation activities tailored to the unique characteristics of each site Promotion of water conservation activities considering the water environment of each country and region 												
Compliance with Regulations and Promotion of Responsible Environmental Management	<ul style="list-style-type: none"> Compliance with environmental laws and regulations in each country and region Ensuring the proper management of chemical substances in accordance with relevant regulatory developments Sincere and appropriate responses to external environmental evaluations and requests 												
Continuous Improvement of the Environmental Management System	<ul style="list-style-type: none"> Continuous reduction of substances of concern Prevention of environmental incidents through risk reduction activities Continuous improvement of the Environmental Management System to enhance efficiency and reliability 												
Fostering Environmental Awareness and Promoting Environmental Partnerships	<ul style="list-style-type: none"> Promoting employee initiative through comprehensive environmental education and awareness efforts Promoting thorough compliance with laws and regulations and the improvement of environmental performance through collaboration with business partners
